OUR SERVICES

We provide functional testing (both manual and automated), environmental analysis, SEO audits, and QA training services.

Manual Testing

DeRisk QA thoroughly tests applications by exercising the best practices of software testing: test plans, test cases, and execution to uncover defects.

Automated Testing

With experience in multiple automated tools, our testers help you develop a test automation solution to save time, increase test efficiency, and improve test coverage.

PROVIDING CERTAINTY IN AN UNCERTAIN WORLD

CERTIFICATIONS

ISTQB

All DeRisk QA testers acquire at minimum a foundation-level certification in ISTQB, or the International Software Testing Qualifications Board, after one year of work experience.

HIPAA

DeRisk QA testers working with protected health information are required to undergo training and receive certifications in HIPAA compliance to privacy and security rules.

ICP-TST

Testers focusing on agile testing techniques and processes receive training and acquire the ICP-TST certification, with focus on delivery through iterations and collaboration with developers.

Automation

Automated testers undertake training courses and receive certifications in tools such as Silk Test, TestComplete, UFT, and Selenium, which hone the skills necessary to develop test scripts.

Why choose us:

- Located onshore in the United States
- Veteran-owned company founded in 1998
- Experience in multiple verticals for businesses ranging from small shops to Fortune 500 companies
- Full-time, W2 employees
- Partnered with Micro Focus, SmartBear, HP, and other tool providers
- Partnership with local college to provide internship for valuable experience
- Named one of the 25 Most Promising QA Testing Service Vendors by Outsourcing Gazette in 2015
